Subject: Fw: Dimock SAPs for Supplemental Round 1 and Round 2

Suddha,

One final comment from the HQ EU is to remove the mercury method from the table as indicated below. Please make this change in both SAPs and date the SAPs 5/16/12.

I will be double checking with Cindy Caporale at Ft. Meade to make sure they agree with the SAPs. I will keep you posted on that feedback. Once I get the green light from Ft. Meade, I will ask Joanna to call the 7 residents and schedule the appointments.

You may go ahead and submit the lab requests and any other paperwork necessary. You should also let me know what Tech Law's scheduling and staffing would be to begin this sampling next week.

thanks. Rich

Rich:

Understand that Terry briefly spoke with you about this

Our only remaining comment/feedback pertain to Tables 1 and 2 of both documents which shows analytical method 245.1 and needs to be deleted, as this is the analytical method for mercury, which is not to be performed.

Other than the above comment, the HQ EOC EU and OEM is good to go with the sampling plans.

Thanks,

Gilberto "Tito" Irizarry

Subject: Dimock SAPs for Supplemental Round 1 and Round 2

Attached are the SAPs for Supplemental Round 1 and Round 2. We believe we have addressed all your comments.

Thanks for that input. Please review and confirm that these sampling plans have your concurrence. If you should have any additional questions, please let me know.

For your information, I still need to get Ft. Meade comments (if any). I will include you all in any substantive comments they may have. Once I have received your confirmation that these plans are ok and I address any Ft. Meade comments, We will begin to schedule the sampling at the homes. We will continue to keep you advised as to our progress.

Rich
